

INSTRUCTIONS FOR APPLYING 4-4-2 STRIPES

PREPARATION:

- a) Area on car where stripe is to be located must be free from dust, dirt and grease.
- b) Locate from the drawing two or three points on the hood, top, and trunk lid.
- c) Remove the first "O" in the OLDSMOBILE letters on the trunk lid. (To remove this "O" there is a screw and clip inside the trunk which has to be taken off.)
- d) Prepare a pail of warm soapy water (Tide preferred).

II. STEP #1:

- Dampen the general area where the stripe is going to be located with a sponge or rag wet with soapy water.

STEP #2:

Peel the backing off the stripe decals and apply stripes over the soapy water. Line up the stripes with the located points to ensure a straight line.

STEP #3:

Use a small plastic squeegee to smooth out the stripes and remove all air bubbles.

STEP #4:

Wipe excess water off edges, corners and surrounding area.

STEP #5:

Re-install letter "O" back on trunk lid.

STEP #6:

- After car has set about one hour at room temperature, go over edges with squeegee to ensure a tight fit.

STEP #7:

To remove stripe, start at one edge and pull at a 45° angle.
